The 340B register and hospital finances — joined, watched daily, delivered.

Sample. This is a real hospital report, exactly as it is delivered to a buyer, marked through with *Sample* so it is not mistaken for a purchased copy. Every figure carries the worksheet, line and column it was read from; the issued block at the end names a sample document.

2. FIVE HOSPITALS IN OHIO OF A SIMILAR SIZE, FISCAL YEAR 2025, WITH THE CELL EACH FIGURE CAME

FROM

The rule: the hospitals in Ohio with a Medicare cost report for fiscal year 2025 whose total facility beds are nearest this hospital's, taken in turn from just below and just above its count until there are five, leaving out any hospital whose as-submitted filing for that year is marked under the rule on the methodology page. They are listed by name, with this hospital among them in bold. Under each figure is its cell on the cost-report form as worksheet, line (L) and column (C); each row names its certification number, report record, form and CMS file.

3. WHERE THIS HOSPITAL SITS

A position, not a grade. Each line names the figure, how it is measured, and the hospitals it is placed among: short-term acute care hospitals in the same state and the same bed-size band, each on its latest filed year. Under it, the same figure across every hospital that filed for the year — a larger set, and a different one.

EVERY COST REPORT ON FILE

One row per filing, oldest first until you say otherwise. Every column orders both ways. Reporting periods differ between filings and the length of each is shown, because revenue over three months set beside revenue over twelve is a wrong number that looks right.

7. THE RECORD'S FULL HISTORY

Three kinds of date are printed here, and each table says which it holds. The 340B register's own dates, for this record, each location under it and each pharmacy arrangement, are printed as filed, back to each one's start. A change between one daily register file and the next is listed with the date of the file that first showed it; this record has been read from the daily file since 6 September 2026, so changes of that kind are listed from then on and none is stated for any earlier date. Every Medicare cost report filed under certification number 360008 is listed with the date on it in the CMS file.

HOW TO READ THIS REPORT

Every figure above is printed as its source document printed it, with the exact place it came from beside it: the worksheet, line and column of the Medicare cost report this hospital filed under CMS certification number 360008. A reader holding the same public file can go to that cell.

Where this hospital is on the 340B covered-entity register, the registration facts come from the HRSA 340B OPAIS Covered Entity Daily Report. The two documents name the same hospital because they carry the same certification number, not because their names resemble each other.

A figure the hospital’s filing does not carry is left out. A figure whose value the filing’s own arithmetic contradicts is also left out. A year filed as submitted whose figures differ from the prior filing by more than the factor stated on the methodology page is marked beside the figure and left out of the distributions and the peer table until a settled version posts. Nothing here is estimated and nothing is carried in from another year.

Every dollar figure, ratio and date is copied from the filing that printed it, and every count is a count of the rows those filings hold. Three shares are divided, each by net patient revenue from the same filing; charity care, uncompensated care and income from service to patients. Positions and distributions — a hospital’s percentile, a median, a middle half, a tenth-to-ninetieth range — are counted over a set of hospitals that each one names. One year is set against another: an as-submitted year’s net patient revenue against the same hospital’s prior filed year, printed as a factor where it is more than 2. Nothing else is calculated. This report carries no share; its positions are in section 3, each naming the hospitals it was taken over.

Financial figures: CMS Healthcare Cost Report Information System, publication year 2024, file HOSP10FY2024.ZIP. Corrections: hello@velarionrecords.com. Velarion Records takes no position on the 340B Drug Pricing Program or anyone taking part in it.
